

CALL FOR PODCAST HOST/PRODUCER!

State of the Pod is Cornell's first and only student-driven podcast production team. We cover the emerging issues in science and tech, with an emphasis on their ethical and social implications. We're a team of motivated and passionate storytellers committed to crafting **well-researched, original episodes** that bridge the gap between the humanities and technical disciplines to make science issues more approachable to broader audiences.

About Us

- 11 episodes released
- Available on spotify, google podcasts, apple podcasts
- Partnered with Milstein & Investigative Biology Laboratories
- Currently producing season 3

Applying to SOTP

Applications will be accepted and reviewed on a **rolling basis until Feb. 21st**. Potential candidates will be contacted by Feb 25th for interviews.

please email your resume, one episode pitch (3-4 sentences) and a brief statement of interest to sotp.cornell@gmail.com

About the role

Podcast producers and hosts are the voice and visionaries of the SOTP production team! We are looking for a motivated digital storyteller with an eye for exploring the broader implications of science and tech issues.

Key Qualities:

- Stays up to date with current events especially in science and tech
- Familiar with podcast formats
- Interest in science communication

Responsibilities

- 2-4 hour weekly commitment for spring '21
- Pitch new ideas during production meetings
- Engage and collaborate with production team on episode development and marketing efforts
- Work independently and creatively without strict guidelines

Outcomes / what we can offer

- Professional experience in podcast production, interviewing and hosting
- Portfolio building opportunities and credits on SOTP episodes
- License to professional audio editing software (Adobe Audition)
- Access to 2 campus recording studios and rentable studio microphones
